Innovative Self-Service Based Solutions

About Rasakiosk

Rasakiosk Company, with over 16 years of specialized experience in the field of designing and producing computer kiosks, is recognized as one of the pioneers in the country's technology industry. We produce products that combine aesthetic appearance, structural durability, ergonomic design, and modern style by utilizing a team consisting of technical specialists, design engineers, and advanced production lines.

What distinguishes Rasakiosk is a perspective beyond producing a device. We provide smart and sustainable solutions for organizations, stores, and service centers to elevate the service delivery process and customer interaction to a new level.

By offering a valid **12-month warranty**, **60 months of after-sales services**, and establishing an extensive sales and support network across the country, Rasakiosk has proven its commitment to quality and customer satisfaction. This infrastructure has enabled our customers to make their investments with complete confidence and benefit from continuous and professional support.

At Rasakiosk, we believe that precise design, high-quality production, and powerful after-sales services are the three main pillars of success, and all our efforts are focused on providing products that, in addition to high technical performance, create a user-friendly and lasting experience.

Major Goals and Policies of Rasa Group

- Increasing sales and market share domestically and internationally by focusing on brand development and effective presence in competitive markets.
- Focusing on sales policy-making for products based on self-service systems in affiliated companies, with the aim of enhancing efficiency and productivity.
- Achieving maximum customer satisfaction through accelerating and facilitating supply, service, and support processes.
- Fully meeting domestic market needs in line with demand and increasing production capacity by at least 30%.
- Enhancing product quality levels by utilizing continuous feedback from the market and customers.
- Identifying new market capacities and demands for developing the product portfolio and offering innovative solutions.
- Creating and developing an electronic sales platform and institutionalizing it in affiliated companies.
- Improving cash flow in subsidiary companies by adopting innovative financial methods.
- Meeting the needs of PSP companies in the software and hardware domains, in line with current standards.
- Identifying export opportunities in the Persian Gulf markets and planning to gain a larger share of these target markets.

ALAN Kiosk

**Beauty in Design,
Intelligence in Performance**

ALAN Kiosk

PRODUCT INTRODUCTION

Combination of Innovation, Beauty, and Efficiency in Service of a Smart Experience

The ALAN digital kiosk is a modern response to the growing need in public, organizational, and commercial spaces for providing quick, transparent, and smart services. This product, relying on ergonomic design, a resistant structure, and high-quality displays in sizes of 15, 19, 22, and 24 inches, showcases a flawless experience of user interaction with latest technologies.

...Outstanding Features

Variety of displays in four sizes (15, 19, 22, and 24 inches) suitable for the organization's needs and space.

Ergonomic and user-friendly design that provides easy use for all segments of society.

Resistant and sturdy body suitable for high-traffic spaces.

Capability to equip with various modules such as card reader, barcode scanner, thermal printer, and more.

Dedicated and expandable software for management, reporting, and adaptation to each organization's internal infrastructure.
